

Tobacco Sales in Chicago

In 2019, total tobacco sales equaled **\$91.1M/year** or **\$251K per day**. This included cigarettes, vaping products, smokeless tobacco, cigars, and loose/pipe tobacco.

Tobacco sales data (Dec. 30, 2018 to Dec. 28, 2019) were licensed from Nielsen, a company that collects proprietary data from convenience stores (chains and smaller independent stores) as well as supermarkets, pharmacies, mass merchandisers (e.g., Walmart/dollar stores), and military commissaries. Nielsen data do not include liquor stores, smoke/vape shops, and online sales. Chicago restricted sales of flavored tobacco near high schools (including menthol) during the study period.

Cigarettes

Cigarettes were **76%** of tobacco dollar sales.

37% of cigarette sales were for **menthol-flavored cigarettes**.

Average pack price:
\$12.96 non-menthol
\$12.77 menthol

Cigars

49% of cigar dollar sales were for cheap **packs of 2**.

At least **412 different cigar products** (including cigarillos, large cigars, premium cigars, and little filtered cigars) were sold.

Pod Vaping Products

In one year, stores sold approximately **2,826 pods per day**, totaling **\$7.8M**.

The Nielsen data underestimate vape product sales. The sales period (12/30/18-12/28/19) occurred after JUUL Labs announced its intent to discontinue US retail distribution of some flavored pods (except mint, menthol, tobacco), and preceded the federal sales restriction on flavored pod/cartridge products.

51% of pod dollar sales were for mint/menthol flavors.
