

Tobacco Sales in Denver

In 2019, total tobacco sales equaled **\$84.7M/year** or **\$233K per day**. This included cigarettes, vaping products, smokeless tobacco, cigars, and loose/pipe tobacco.

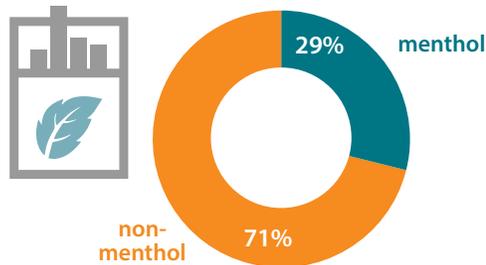

Tobacco sales data (Dec. 30, 2018 to Dec. 28, 2019) were licensed from Nielsen, a company that collects proprietary data from convenience stores (chains and smaller independent stores) as well as supermarkets, pharmacies, mass merchandisers (e.g., Walmart/dollar stores), and military commissaries. Nielsen data do not include liquor stores, smoke/vape shops, and online sales.

Cigarettes

Cigarettes were **72%** of tobacco dollar sales.

29% of cigarette sales were for **menthol-flavored cigarettes**.

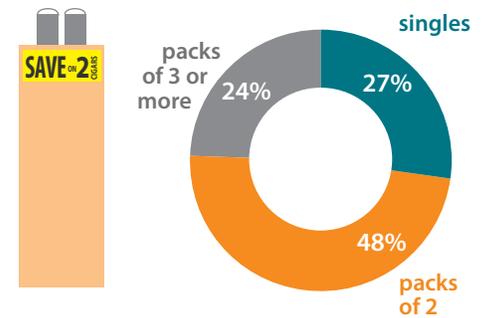

Average pack price:

\$6.07	\$6.13
non-menthol	menthol

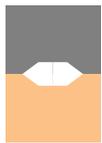

Cigars

48% of cigar dollar sales were for cheap **packs of 2**.

At least **515 different cigar products** (including cigarillos, large cigars, premium cigars, and little filtered cigars) were sold.

Pod Vaping Products

In one year, stores sold approximately **4,826 pods per day**, totaling **\$7.7M**.

The Nielsen data underestimate vape product sales. The sales period (12/30/18-12/28/19) occurred after JUUL Labs announced its intent to discontinue US retail distribution of some flavored pods (except mint, menthol, tobacco), and preceded the federal sales restriction on flavored pod/cartridge products.

71% of pod dollar sales were for mint/menthol flavors.
